## FOREWORD

I am pleased to present the 1983 edition of the "Directory of Manufacturers, Newfoundland and Labrador".

The aim of this Directory is to provide a current source of information on local manufacturers, their products and their capabilities. It will be of assistance to domestic and foreign buyers particularly in ensuring adherence with provincial preference policies. It will also be valuable to companies and individuals in developing related business and manufacturing opportunities in the Province. In short, this Directory will promote a better knowledge of our manufacturing sector and thereby an expansion of business contacts and an increase in manufacturing activities.

It is intended that this Directory will be updated on a regular basis. I trust it will be of benefit to you.

**HON. H. NEIL WINDSOR, P. Eng.**
**Minister of Development**

Development Services, Industrial Services, Tourism, Physical Planning, Newfoundland and Labrador Housing Corporation, and Development Corporations.

## INTRODUCTION

This Directory attempts to bring together only those firms that are involved in the manufacturing/processing sector. Companies with diversified operations are listed with respect to their manufactured products only.

It is recognized that there may be manufacturers omitted from these listings. Manufacturers and processors who have been overlooked are encouraged to become a part of the Directory in the future.

We wish to thank the individual firms for their co-operation in supplying the information utilized in this Directory. Updates on data and general comments are welcomed.

## HOW TO USE THIS DIRECTORY

The pertinent information on an individual company is contained in the alphabetic listing of all companies. Two additional listings are provided to assist the user in sourcing back to the alphabetic listing. The geographic listing is based on the areas outlined on the accompanying map. The geographic listing provides the company name with its industrial classification and thus the user is referenced to the alphabetic listing. The second listing is by products. Here, under a given product, the company name is listed once again, thus the reference for the alphabetic listing is provided. Companies with more than one branch are indexed through their head office.

Each company is also classified according to major industrial groups. The Standard Industrial Classification (SIC 3-digit, 1980) as developed by Statistics Canada has been utilized. While each company is assigned the 3-digit number, an index by SIC is not included. It was found that the product index closely paralleled the SIC index and thus, the information would be redundant for most users. Listings are avilable to interested users upon request. The area code for all telephone numbers in Newfoundland and Labrador is 709.
